## Structure

### Solid Overlay

A transparent, wear-resistant overlay providing protection against stains, impact, scratches, burns and household chemicals.

### Decorative Paper

A design layer of high-resolution photo of real wood that is reproduced with sophisticated printing techniques.

### HDF Core Board

The main floorboard structure made of High Density Fiberboard (HDF) and is durable and stable moisture-resistant.

### Balancing Layer

Gives a balanced structure board when properly installed and maintained.

## Advantages

Stain  
Resistant

Easy  
Maintenance

Flame  
Resistant

Bacteria  
Free

Water  
Resistant

Scratch  
Resistant

Impact  
Resistant

Hassle-free  
Installation

# Why choose Laminate Flooring ?

With the look and texture of wood, laminate flooring is a tough and durable man-made product that is easy to clean, pet-proof and easy to install. With HDF (High Density Fiberboard) made different thickness, widths and lengths, laminate is great for homes that want the look of wood, but with a floor that delivers great value. The printed decor layer of laminate flooring means that it can provide many different looks without trading anything in durability or ease of living. Packed to the brim with easy living advantages, this is ideals for homes and moderate commercial area that want a good looking floor.

## Skirting & Cap

FLOOR DEPOT offers a wide range of optically matching WALLine skirting for a harmonious look for any wood surface enable the possibility of conscious accentuation.

## Underlay

Function as to smooth out minor unevenness and at the same time provide high compressive strength. This ensures the required moisture protection in the case of mineral substrates.

## Profile

Combine PVC profiles from FLOOR DEPOT, create finishes for a floor aesthetic that is perfect in every respect.

### Adaptation Profile

used to transition from a wood floor to a floor that is lower than wood floor installed.

### End Profile

used to transition from a wood floor to another type of flooring or floor that is higher than the wood installed.

### Transition Profile

used to transition from a wood floor to another that both floors are the same height.

### Stairnose Profile

used whenever there is a step down or staircase that will be receiving wood floor.

## Specifications

Series | Board Size | Package Content | Surface Treatment | Edge Treatment | Joining Mechanism | Area Size | Suitability
